Titan Core Systems

The complete versatility of the Titan Core System will handle a multitude of functions in the laboratory environment. The system is extremely adaptable and durable to exceed your laboratory needs. The core has slotted uprights for shelving, table frames, and cabinet options.

Key Features

- Titan Core System configurations can be readily created and easily changed as well as moved for new applications or changing space.
- Can be used in conjunction with suspended, mobile or floor-mounted casework.
- Solid durable construction
- Includes a fine adjust leveling foot
- Static capacity of 2600lbs (on a double sided, four shelves, two table frame unit) SEFA tested
- Cantilever table frames available in depths of 24" & 30"
- Available in: 24", 30", 36", 42", 48", 54", 60", 72"
- Cabinets: mobile, suspended, or floor mounted ordered separately
- Counter top options available in Phenolic & Epoxy
- Order shelving separately. Shelf brackets are adjustable in 1" increments to allow for multiple configurations. Shelf depths vary based on necessity.
- Standard shelves are 12", 14", 16", and 18" deep. Shelves can be flush to the core uprights or inset 6" between core uprights. 12" inner shelves available to work in conjunction with standard exterior shelves.

Titan T12 - Box Core

The Titan T12 box core is 84 5/16" tall and available from 24" to 72" wide, with levelers having 1" of adjustment. The unit is floor mounted for wall or island configurations. The box core has components such as: shelving, cantilever frame, structural cantilever table, and suspended cabinets. All components attaching to the core are ordered separately. Electrical, data or plumbing services are available in lower fixed and reagent panels.

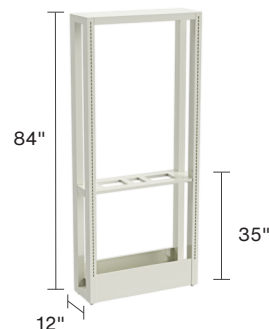

T12 BOX CORE LOAD RATINGS

Parts	Loading Rate
Top Shelf	100lbs
Shelving	200lbs
Suspended Cabinet	300lbs
Upper Suspended Cabinet	300lbs
Cantilevered Table Work Frame	800lbs
Total Core Assembly	2,500lbs

Titan T12 - Box Core

The Titan T12 box core is 84 5/16" High, available from 24" to 72" wide, and has levelers with 1" adjustment. The unit is floor mounted making it suitable for wall or island configurations, where general services are needed. The box core has components such as inserts, shelves, cantilever table, structural cantilever table, and suspended cabinets. All the components are ordered separately. Another feature is the option of having removable panels and to indicate removable panels change (0) to (2). For epoxy or phenolic tops, replace N for E or P respectively. Electrical services are available in lower fixed and reagent panels. For more information please contact sales representatives.

Titan T3 — Wall Panel Lower Box

The Titan T3 wall panel lower box core is 35 or 47" tall and available 24" to 72" wide with levelers having 1" of adjustment. The unit is floor mounted for wall configurations. The lower box core has components such as: shelving, cantilever frame, structural cantilever table, and suspended cabinets. All components attaching to the core are ordered separately. Electrical, data or plumbing services are available in lower fixed and reagent panels.

Titan Box Frame

The Titan T12 box frames are 48" tall and available from 24" to 72" wide. The frame allows for use of vertical space above work surface. Box frames are easily bolted to counter top. Shelving and wall can be used with Titan cores with uprights. Slotted uprights with 1" increments allow for height adjustment cabinets or shelving. T9 unit is designed for use when the casework is against the wall. This unit has the same specifications as the T12 Box Frame above except it is 9" deep. This unit is a single sided unit. Side panels to cover the space between uprights can be ordered separately and services can be run through them. All the components are ordered separately.

TITAN BOX FRAME ASSEMBLY

The unit allow use of vertical space above work surface when needed.

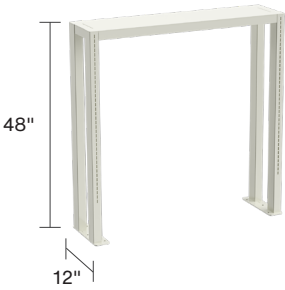

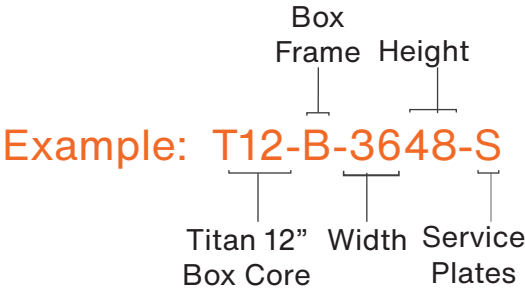

The Box Frames are easily bolted to the countertop.

The shelving and wall storage used with Titan cores works with box frame uprights.

There are slotted uprights with 1" increments to allow height adjustment with cabinets and shelves.

Titan Shelf Kit

Titan shelving come in four different styles. There are Bookend (B), Inverted (U), Seismic Rod (SR), and Inner (I). The shelves will fit in any Titan Core, Titan Box Frames, Titan Work Benches, and Titan Mobile Carts. Kit widths should match the width of the unit it is paired with. Standard depth kits Shelves are the same depth as brackets and set with flush mount uprights. Extended depth kits shelves are deeper than the brackets and extended to the back. We offer 1", 3", and 6" extended shelf kits.

Cantilever Table Frame

Cantilever table frames are an essential component setting a Titan configuration in your lab. The frames are constructed in 14 gauge steel, come in two different styles. Structural cantilever table and cantilever table. Both tables will support up to 800lbs loaded evenly. The structural support table frames (SCTF) attach directly to the core, allowing it to support the Island or wall cores. This setup is ideal when cores cannot be anchored to the floor. The table has a fixed height of 29" or 35". The cantilever table frames (CTF) attach directly to the bolted core and is adjustable in one inch increments. Both frames can support suspended cabinets.

Wall Rail System

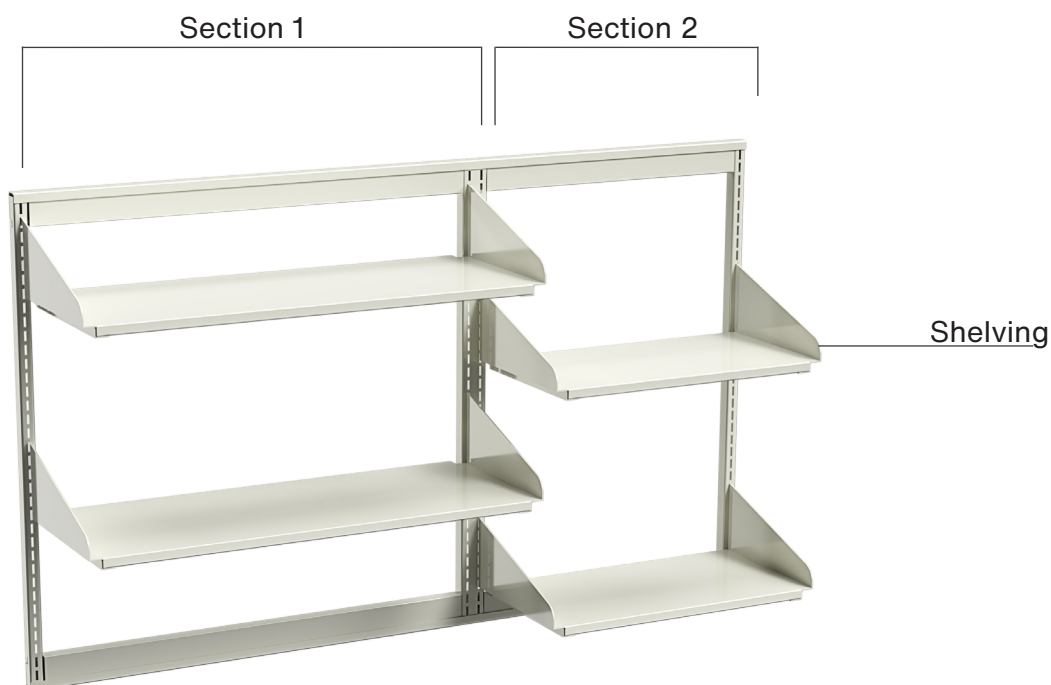

The wall rail system is installed in applications where there may not be backing to support standards and only shelving will be installed. With a 1" profile, heights of 24", 30", 36", 42" and widths from 24"-72", this system is very flexible to change shelf widths in the future. Proper blocking required for horizontal rails. Wall shelf kit ordered separately (See page 31).

WALL RAIL SYSTEM LOAD RATINGS

Parts	Loading Rate
Shelving with Bracket Depth 12 and 14	200lbs
Shelving with Bracket Depth 16 and 18	160lbs
Maximum Per Section	400lbs

For shelving only. If cabinets or cantilever frames are required, use our heavy duty wall rail system (page 32).

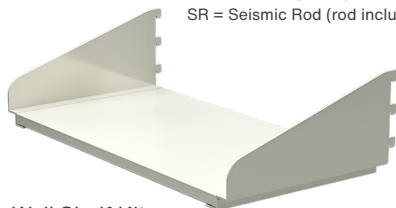

Titan Wall Shelf Kits

* TWSK Only use with wall rail system.

Wall Standards

Wall standards are the least expensive way to install shelving for a wall. It requires full proper blocking along the whole standard to assure they able to hold the weight on the shelves.

Example: MTS1136

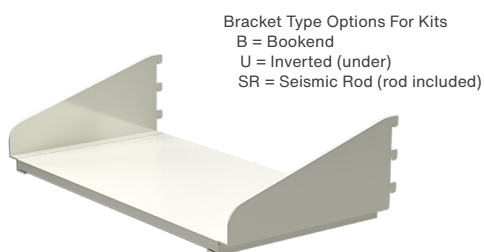

WALL STANDARDS

Height	Item Number
24"	MTS1124
30"	MTS1130
36"	MTS1136
42"	MTS1142
48"	MTS1148

Titan Work Bench - No Services

Titan Work Bench (TWB) gives the maximum flexibility for configuring your lab. Wall and island configurations can be readily created and easily changed as well as moved for new applications or changing space. Can be used in conjunction with suspended and mobile. Standard tables are 36" high and allow depths of 30" & 36" deep. Adjustable height units range from 30-36" high. They can be fixed or adjustable in height. In this model you can have leveling feet or casters installed. The table will support up to 1,000lbs. Order WB shelving separately. Shelf brackets are adjustable in 1" increments to allow for multiple configurations. Standard shelves are 12" or 16" deep.

TWB Bottom Shelf only
available if stationary

Titan Work Bench - Double-Sided

Titan Work Bench (TWB) gives the maximum flexibility for configuring your lab. Wall and island configurations can be readily created and easily changed as well as moved for new applications or changing space. Can be used in conjunction with suspended and mobile. Standard tables are 36" high and 30" deep. Adjustable height units range from 30–36" high. They can be fixed or adjustable in height. In this model you can have leveling feet or casters installed. The table will support up to 1,000lbs. Order WB shelving separately. Shelf brackets are adjustable in 1" increments to allow for multiple configurations. Standard shelves are 12" or 16" deep.

Table Frame

Table Frames (TF) are available in standard depths of 30" and 36". They can be fixed or adjustable in height. Many sizes are available. As standard, this 1000 lb.capacity table has strut installed for future suspended cabinet installation. Table Frames height adjustments range between 30" to 38".

Table Frame Width Depth

Example: TF-AL4230-N

L = Leveler Feet
 C = 250# Locking Casters
 H = 550# Leveling Casters

 A = Adjustable Height
 S = Stationary (Fixed Height)

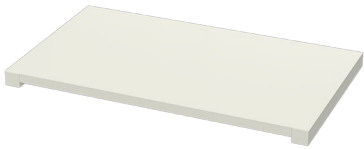

N = No Top
 E = Epoxy Top
 P = Phenolic Top
