OVERVIEW

The A-Frame table is a robust desk/table ideal for any educational setting. Its straightforward yet durable design features 16-gauge cold-rolled 2" x 2" tubing, reinforced by a 14-gauge cold-rolled steel stretcher, ensuring long-lasting use. The overhanging surface allows students to sit on all four sides, optimizing your space. Pre-drilled locations beneath the surface facilitate the simple addition of optional backpack hangers. Choose between levelers or locking casters for enhanced versatility. Casters are available only on the 40" high base. For cost-effective shipping, the table will be delivered disassembled, with hardware included for straightforward onsite assembly.

MATERIALS

The A-Frame Table is constructed using 16-gauge, 2" x 2" cold-rolled steel tubing, and reinforced with a 14-gauge cold-rolled steel stretcher. It comes equipped with leveling glides or 3" locking casters. Surface is 3/4" thick and available in either phenolic resin or our selection of standard laminates. The entire assembly boasts a durable powder-coated finish. For economical shipping, the table will be ship knocked down, complete with all necessary hardware for easy on-site assembly.
